- The Net AHRI Water Ratings are based on a piping and pickup allowance of 1.15.
- The manufacturer should be consulted before selecting a boiler for installations having unusual piping and pickup requirements, such as intermittent system operation, extensive piping systems, etc.
- Refer to manual for system vent length derates.

4. High altitude versions of all models available for installations over 4500ft. De-rate required on all models installed above 2,000 ft., consult factory for details. For Canadian installations over 4,500 ft., consult authority having jurisdiction for guidance. SHADW080 may not be installed using LP gas above 2,000 ft. SHADW180 may not be installed using LP gas above 7,800 ft.
